- **cd Downloads**
  Usage: Used to move into the Downloads directory.
  Example: cd Downloads

- **terraform init**
  Usage: Initializes Terraform by downloading required providers and setting up the project.
  Example: terraform init

- **terraform plan**
  Usage: Displays the execution plan showing what resources will be created, modified, or destroyed.
  Example: terraform plan

- **terraform apply**
  Usage: Applies the Terraform configuration and creates infrastructure.
  Example: terraform apply

- **terraform destroy --auto-approve**
  Usage: Destroys all Terraform-managed resources without confirmation.
  Example: terraform destroy --auto-approve
