Totally java ,python npm was installed using the playbook ansible adhoc commands.

Using codes :

```
---
- name: Install Java and NodeJS on Amazon Linux 2
  hosts: appservers
  become: yes

  tasks:

    - name: Install Java 17
      yum:
        name: java-17-amazon-corretto
        state: present

    - name: Install NodeJS
      yum:
        name: nodejs
        state: present

    - name: Verify Java
      command: java -version
      register: java_output
      ignore_errors: yes

    - debug:
        var: java_output.stderr

    - name: Verify Node
```

```
    command: node -v
    register: node_output
    ignore_errors: yes

  - debug:
      var: node_output.stdout
```

adhoc commands:

<ansible -i inventory.txt all -m yum -a "name=python3 state=present" –become> for python,

<ansible-playbook -i inventory.txt playbook.yam1> for playbook.
